

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

GENETICS AND BREEDING<sup>1</sup>

## CONTENTS

<i>Genetics and Breeding</i> : PROFESSOR RAYMOND PEARL .....	539
<i>The Metamorphosis of the Carnegie Foundation</i> : PROFESSOR ARTHUR O. LOVEJOY ....	546
<i>George Harold Drew</i> : PROFESSOR ALFRED G. MAYER .....	552
<i>Fur Seal Legislation</i> : PRESIDENT DAVID STARR JORDAN, GEORGE ARCHIBALD CLARK	553
<i>The Eugenics Record Office</i> .....	553
<i>The National Academy of Sciences</i> .....	554
<i>Scientific Notes and News</i> .....	555
<i>University and Educational News</i> .....	558
<i>Discussion and Correspondence</i> :—	
<i>Electromagnetic Induction and Relativity</i> : DR. S. J. BARNETT. <i>A Labeling Surface for Laboratory Glassware</i> : DR. A. F. BLAKESLEE. <i>Most is—What?</i> PROFESSOR F. W. MARTIN .....	560
<i>Scientific Books</i> :—	
<i>Northrup on Methods of Measuring Electrical Resistance</i> : DR. FRANK WENNER. <i>Babcock's Metabolic Water</i> : PROFESSOR RAYMOND J. POOL. <i>Carrington on Fresh Air and how to use it</i> : DR. HENRY SEWALL	562
<i>Scientific Journals and Articles</i> .....	565
<i>The Influence of Various Educational Institutions upon the Development of Agricultural Science</i> : PROFESSOR R. W. THATCHER ....	566
<i>Special Articles</i> :—	
<i>The Distribution of Occidental Spiders</i> : DR. FRANK E. LUTZ .....	567
<i>The American Association for the Advancement of Science</i> :—	
<i>Section D</i> : G. W. BISSELL .....	568
<i>Societies and Academies</i> :—	
<i>The Helminthological Society of Washington</i> : MAURICE D. HALL. <i>The Anthropological Society of Washington</i> : W. H. BABCOCK. <i>The Clemson College Science Club</i> : F. R. SWEENEY .....	

ONE of the primary purposes for which the American Breeders' Association was founded was to bring together on a common ground those who were approaching the problem of the improvement of plants and animals by breeding, on the one hand, from the side of practical breeding, and, on the other hand, from the side of the scientific study of heredity. One of these groups stands as the representative of the art or craft of breeding, and the other as the representative of the science of genetics. That each of these two bodies of men has something to learn from the other there is no doubt. Even with the continued and prosperous existence of such an association as this it is certain that actually there is far from being anything like as extensive a mutual interchange of knowledge and opinion between science and practise in breeding as would appear from every point of view to be desirable.

It will have been perceived by all who have followed my remarks so far that they have been commonplace to the point of utter banality. They constitute a thoroughly bromidic introduction to a conventional treatment of that time-stained and battle-scarred old theme of compulsory oratory, the relation of science and practise. Every one can foresee, with a moment's reflection, just what ought to come next, and next, and on to the end. At the outstart should be set forth the great achievements

<sup>1</sup>Papers from the Biological Laboratory of the Maine Agricultural Experiment Station, No. 44.

Address of the retiring chairman of the Animal Section of the American Breeders' Association at its Columbia, S. C., meeting in January, 1913.
